SHAMEERA S. I.

Chennai, India | 9629370455 | shameerakumar5@gmail.com | linkedin.com/in/shameera-selvakumar-9b0ab7248

Professional Summary

Junior Cloud Engineer with over a year of hands-on experience running infrastructure across 4 AWS accounts, 3 Oracle Cloud servers and 3 on-premises PC servers. Deploys and monitors web and mobile applications using Linux, Docker, Nginx, Jenkins and Prometheus, and publishes Expo apps to the App Store and Google Play. Leads a 5-member R&D team that evaluates open-source tools for self-hosting.

Education

St. Joseph's Institute of Technology, Chennai

Bachelor of Engineering, Electronics and Communication Engineering

April 2025

- CGPA: 8.14

Skills

- **Cloud & Infrastructure:** AWS (EC2), Oracle Cloud, on-premises servers, server migration, Terraform
- **Containers:** Docker, Docker Compose, Portainer, Coolify
- **CI/CD & Source Control:** Jenkins, GitLab, branch-based deployments
- **Linux & Networking:** Ubuntu, Nginx reverse proxy, DNS, SSL/TLS, SSH, WireGuard VPN
- **Monitoring:** Prometheus, Grafana, Node Exporter, Loki
- **Databases & Storage:** Database deployment and migration, MinIO, RustFS
- **Mobile Release:** Expo managed and bare workflows, Apple Developer, Google Play Console
- **Certification:** IoT & Networking (NPTEL)
- **Languages:** Tamil, English

Relevant Experience

Kriha IT Solutions, Chennai

Junior Cloud Engineer, Cloud Team

September 2025 – Present

- Deploy and maintain frontend and backend web applications across 4 AWS accounts, 3 Oracle Cloud servers and 3 on-premises PC servers.
- Set up Docker-based environments, Nginx reverse proxies, domains and SSL

certificates for application access.
- Create and troubleshoot Jenkins pipelines connected to GitLab repositories, handling build agents, credentials and environment settings.
- Monitor servers and containers with Prometheus and Grafana, and investigate CPU, memory, disk and service problems.
- Deploy databases, support migrations between environments, and manage object storage with MinIO.
- Build Expo apps (managed and bare workflows) and publish them through Apple Developer and Google Play Console.

Additional Experience

Kriha IT Solutions, Chennai

R&D Team Lead

September 2025 – Present

- Lead a 5-member R&D team covering testing, frontend, backend, cloud and UX/UI: choose open-source tools to evaluate, test whether they can be deployed reliably, and assign and track technical tasks.
- Evaluated and deployed self-hosted tools including Hermes, Penpot, OpenNotebook, Frappe, Chatwoot, RustFS and MinIO.

Selected Projects

- **Application Deployments:** Deployed and released four live applications, handling server setup, frontend and backend release, domains and SSL:
    - **Collabon:** school administration platform where students view their marks and attendance.
    - **Krihapay:** recharge and payment app, for example topping up a balance to spend at a food court.
    - **Emagrigoat:** e-commerce app selling organic dals and farm products.
    - **Tedihsrp:** vehicle search app where users look up a vehicle by its number.
- **Kriha Megam:** Contributed to infrastructure and deployment work for the company's managed cloud services platform.
